

Building what's next in digital government services

For over a decade, Ad Hoc has led the charge in transforming how the federal government serves people. **We started the digital services revolution, and we're not slowing down.**

DIGITAL EXPERIENCES

Human-centered design and development that works. Enable multi-channel digital experiences that scale service delivery and drive positive outcomes.

- **UI / UX** and **service design**
- **Web and native mobile development**
- **Omni-channel development**

SYSTEMS TRANSFORMATION

Build your digital capacity in-house. We don't just build services, we help agencies become digital-first organizations. Ship faster, scale reliably, and cut long-term risk by replacing legacy systems with cloud-native solutions.

- **Application** and **API development**
- **Platform development**
- **Delivery platforms** and **cloud migration**

DATA INTEROPERABILITY

Bringing data together to empower your audience. We're building data connectivity across systems through strong governance, standards, API infrastructure, and AI readiness.

- **Data strategy** and **visualization**
- **Data infrastructure** and **automation**
- **Data access** and **APIs**

AI AND AGENTIC AUTOMATION

Defining what's next in government service delivery. We're helping agencies develop infrastructure and AI-driven automation that uses data to transform digital experiences, reduce costs, and build trust.

- **Agent** and **automation development**
- **Agent platforms**
- **AI infrastructure**

We build **digital-first agencies** that serve people with the speed, efficiency, and care they deserve today. Our purpose-built teams, AI-accelerated development, and proven platforms **reduce risk while maximizing outcomes.**

OUR CUSTOMERS

State of **Colorado**

General Services Administration

Department of **Health** and **Human services**

The **Library** of **Congress**

National Aeronautics And Space Administration

National Oceanic and Atmospheric Administration

The **Office** of **Personnel Management**

Department of **Veterans Affairs**

CASE STUDY:

Search.gov

When GSA needed to redesign their search platform **serving 286.5 million public queries** across **2,100+ federal websites**, our purpose-built team partnered with GSA to enable a **63% increase in page views**, **21% longer engagement time**, and **75% positive user satisfaction** — proving that government services can achieve consumer-grade user experiences and get there quickly.

ENABLING OUTCOMES

41%

more efficient infrastructure use for *Healthcare.gov* compared to commercial-sector standards.

4.8

out of 5 stars for the VA *Health and Benefits* mobile app

40%

increase in enrollments with Medicare's new *Plan Finder* tool
