December 7-8, 2007—This weekend, [30 open government advocates](#) gathered to develop a set of principles of open government data. The meeting, held in Sebastopol, California, was designed to develop a more robust understanding of why open government data is essential to democracy.

The Internet is the public space of the modern world, and through it governments now have the opportunity to better understand the needs of their citizens and citizens may participate more fully in their government. Information becomes more valuable as it is shared, less valuable as it is hoarded. Open data promotes increased civil discourse, improved public welfare, and a more efficient use of public resources.

The group is offering a set of fundamental principles for open government data. By embracing the eight principles, governments of the world can become more effective, transparent, and relevant to our lives.

[Your comments are welcome!](#)

Open Government Data Principles

Government data shall be considered open if it is made public in a way that complies with the principles below:

1. [Complete](#)
All public data is made available. Public data is data that is not subject to valid privacy, security or privilege limitations.
2. [Primary](#)
Data is as collected at the source, with the highest possible level of granularity, not in aggregate or modified forms.
3. [Timely](#)
Data is made available as quickly as necessary to preserve the value of the data.
4. [Accessible](#)
Data is available to the widest range of users for the widest range of purposes.
5. [Machine processable](#)
Data is reasonably structured to allow automated processing.
6. [Non-discriminatory](#)
Data is available to anyone, with no requirement of registration.
7. [Non-proprietary](#)
Data is available in a format over which no entity has exclusive control.
8. [License-free](#)
Data is not subject to any copyright, patent, trademark or trade secret regulation. Reasonable privacy, security and privilege restrictions may be allowed.

Compliance must be *reviewable*.

Transparency and Open Government

MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

SUBJECT: Transparency and Open Government

My Administration is committed to creating an unprecedented level of openness in Government. We will work together to ensure the public trust and establish a system of transparency, public participation, and collaboration. Openness will strengthen our democracy and promote efficiency and effectiveness in Government.

Government should be transparent. Transparency promotes accountability and provides information for citizens about what their Government is doing. Information maintained by the Federal Government is a national asset. My Administration will take appropriate action, consistent with law and policy, to disclose

Impact.

Smart Chicago
COLLABORATIVE

The logo for Smart Chicago Collaborative features the words "Smart Chicago" in a large, bold, blue sans-serif font. A red five-pointed star is positioned above the letter "i" in "Chicago". Below "Smart Chicago", the word "COLLABORATIVE" is written in a smaller, bold, green sans-serif font, with all letters in uppercase.

The screenshot shows the homepage of the National Telecommunications & Information Administration (NTIA), part of the United States Department of Commerce. The header features the NTIA logo and navigation links for Home, Grants, Newsroom, Publications, Blog, Offices, About, and Contact. A search bar and social media icons are also present. The main content area is titled 'Home » Grants' and features a section for the 'Broadband Technology Opportunities Program' (BTOP). This section includes a detailed description of the program, a 'See also' link to 'NTIA's Recovery Act broadband programs', and a filter interface for browsing by content type, month, and year. Below the filter, two news items are displayed: a report from September 2016 and a blog post from April 2016. A sidebar on the left lists various topics, and a right sidebar features 'Featured Initiatives' such as Digital Literacy, Broadband USA, and the Internet Policy Task Force.

Broadband Technology Opportunities Program

The Broadband Technology Opportunities Program (BTOP) is an approximately \$4 billion grant program administered by NTIA to help bridge the technological divide; create jobs; and improve education, health care, and public safety in communities across the country. Funded by the American Recovery and Reinvestment Act of 2009, BTOP projects are deploying broadband Internet infrastructure, enhancing and expanding public computer centers, and encouraging the sustainable adoption of broadband service.
